Welcome to 
My name is Jennifer Van Dyken, and I am looking forward to teaching Engineering and Science Calculus at Anderson Christian School. This will be my fourth year teaching at ACS, while being my sixteenth year as a faculty member at Clemson University in the School of Mathematical and Statistical Sciences.

I have a BA in Mathematics from Southwestern University in Georgetown, Texas, an MS degree in Mathematical Sciences from Clemson University, and a PhD in Engineering and Science Education, also from Clemson University. I've taught several courses at Clemson, including Business Calculus I and II, Calculus I for engineering and science majors, and Business Statistics. While I've been teaching Business Calculus for several years, I'm excited to Calculus I for engineering and science majors at ACS this year!

My husband and I have been married 18 years. We're both from Texas but call Anderson our home now. We have two daughters at ACS; one will be starting middle school this year, while the other is still in elementary. This will be our 7th year as ACS parents.

I look forward to working with you all soon.

Dr. Van Dyken
